PROFESSIONAL SUMMARY

Flutter Developer with 2+ years of experience building and maintaining production mobile applications across fintech, BBPS, digital lending, B2B, and B2C domains. Strong expertise in Flutter, Dart, BLoC, Cubit, GetX, Clean Architecture, REST APIs, Firebase, payment integrations, and Android/iOS deployments. Experienced in production debugging, crash resolution, native Android integration, and end-to-end application development and release management.

TECHNICAL SKILLS

- **Languages & Frameworks:** Flutter, Dart, Java, Kotlin, Android, iOS
- **State Management & Architecture:** GetX, BLoC, Cubit, MVC, Clean Architecture, Dependency Injection
- **Backend, API, & Cloud:** REST APIs, WebSockets, Dio, Firebase (Auth, Cloud Messaging), Google Cloud Platform
- **Fintech:** AEPS, BBPS, DMT, QR Codes, Payment Gateway Integration, Travel bookings, Wallet Flows, Native SDK Integration.
- **Development & Release:** Git Version Control (Git, GitHub, GitLab, Bitbucket), Android Studio, Xcode, Firebase Crashlytics, Google Play Console, App Store Connect, Postman, Swagger, Jira
- **Additional:** React, JavaScript, Node.js, MySQL, MongoDB Atlas, Figma

WORK EXPERIENCE

MOBILE APP DEVELOPER | SP TRANSACTION HUB TECHNOLOGIES PVT. LTD.

Apr 2026 – Present

- Responsible for end-to-end development of two Flutter apps: a BBPS payment application and a digital lending application.
- Lead application architecture, project configuration, feature development, REST API integration, debugging, testing support, and release preparation.
- Develop BBPS workflows covering biller discovery, dynamic forms, plan retrieval, bill validation, wallet and gateway payments, and transaction tracking.
- Architect the lending application using BLoC, clean architecture, dependency injection, secure storage, reusable components, and guarded routing.
- Configure Firebase, Google Cloud, Android and iOS environments, signing credentials, Google Play Console, and App Store Connect.

FLUTTER DEVELOPER | WEBPLAT TECHNOLOGIES PVT. LTD.

Nov 2025 – Apr 2026

- Developed and maintained more than five production Flutter applications across B2B, B2C, and payment-based domains.
- Systematically debugged and resolved 200+ issues across UI, business logic, REST APIs, Gradle, and native Android layers.
- Developed notifications, payment, transaction, and reporting modules for multiple client configurations using flavors.
- Monitored crashes and ANRs using Firebase Crashlytics and Google Play Console and implemented stability and performance improvements.
- Integrated a Java-based custom payment gateway SDK and supported Android and iOS production releases.

SOFTWARE ENGINEER | TECHRIIGOUR IT SOLUTIONS PVT. LTD.

Jun 2024 – Nov 2025

- Promoted from Intern to Software Engineer based on consistent performance and ownership.
- Built and maintained production Flutter applications following the MVC architecture pattern using GetX state management, REST APIs, and Firebase services.
- Implemented authentication, push notifications, and real-time chat features using Firebase services.
- Contributed to core application modules and supported production releases by systematically debugging and resolving post-deployment issues and performance bottlenecks.

PROJECTS

PEYS APP | SP TRANSACTION HUB TECHNOLOGIES PVT LTD

In Development

- Developing a complete Flutter-based BBPS application covering biller selection, service-specific dynamic forms, plan discovery, bill fetching, validation, payments, wallet handling, and transaction tracking.
- Responsible for Flutter architecture, API integration, Firebase and cloud configuration, Android and iOS setup, reusable components, testing support, and deployment preparation.

PR FIN HUB APP | SP TRANSACTION HUB TECHNOLOGIES PVT LTD

In Development

- Architecting and developing a scalable Flutter lending application using BLoC, clean architecture, dependency injection, secure storage, structured networking, and guarded routing.
- Building a reusable foundation for authentication, onboarding, application workflows, document handling, permissions, themes, common components, and environment configuration.

WOWPE APP | WEBPLAT TECHNOLOGIES PVT LTD

App Store & Play Store

[Link](#)

- Resolved 50+ production issues related to UI and logical flows and stabilized critical user journeys in a live Flutter application.
- Owned and developed the complete notifications flow, supporting promotional images, dynamic sounds, channels, and multiple client configurations.

- Contributed to the development of a live fintech application enabling merchants to process rural financial transactions like, DMT, AEPS, settlements, Wallet top-up, loans, credit cards, BBPS, and bus, train, and flight bookings.
- Diagnosed and resolved production crash issues, reducing reported crash incidents from approximately 20,000 to under 500 and significantly improving application stability across devices.

- Developed a vehicle sticker and parking management application for a housing society, enabling smooth enforcement of society parking rules in place of manual paperwork.
- Built role-based access for management and residents, including sticker issuance and deactivation, vehicle-to-owner lookup by sticker number, and admin-only reporting on sticker data along with penalty for parking-rule violations for residents and visitors.
- Integrated REST APIs and Firebase modules for authentication, notifications, and real-time updates, and supported production releases through UI and performance improvements.

- Built a responsive and modern personal portfolio website showcasing skills and projects. Used React for component-based architecture and Tailwind CSS for clean and professional styling.
